

ULTRAVOLT HVA SERIES

PRECISION HIGH VOLTAGE AMPLIFIER

The UltraVolt® HVA series of DC-to-DC high voltage power supplies operates a precision filter/divider and linear HV switch to produce a high voltage amplifier (HVA). These modules provide a high-resolution, programmable, high voltage DC to full scale waveform capability greater than 1 kHz output. This is optimized for bias applications while providing excellent line regulation, load regulation, dynamic response, and stability. It can both source and sink current.

PRODUCT HIGHLIGHTS

- DC, reversible, and amplifier modes
- Fast slew rate (40 V/μs) and high bandwidth
- Can both source and sink current
- Bipolar models available at 0 to 5 kV
- Unipolar models available at 0 to 10 kV
- PPM level line and load regulation
- 50 ppm temperature coefficient (25 ppm optional)
- Available reduced ripple option
- Differential precision 0 to 10 VDC control input
- Precision output voltage and current monitors
- UL/cUL recognized component; CE Mark (LVD and RoHS)

TYPICAL APPLICATIONS

- Drivers
 - PZT actuators
 - MEMS devices
 - Electroactive polymers
 - Electrorheological materials
 - Electrohydrodynamics
 - Electrostatic chuck
 - Pockels cells
 - Laser and electro-optic modulation
 - Electrophoresis
- Amplifiers
 - Beam devices such as mass spectrometers and electron microscopes as electrostatic deflection/focusing, flocking, coating, electrospinning, precipitation, and electrocoalescence

ABOUT ADVANCED ENERGY

Since 1981, UltraVolt® — now part of the Advanced Energy (AE) family — has perfected how power performs for its customers. For both end users and OEMs, AE's comprehensive portfolio of standard and custom high voltage components precisely match system specifications to deliver unparalleled energy, quality, and performance. Through close customer collaboration, design expertise, application insight, and world-class support, AE creates successful partnerships and enables customers to push the boundaries of innovation and stay ahead of evolving market needs.
